## PROJECT

### ● To create a Registration page using HTML,CSS

Developed a responsive Registration Page using HTML and CSS, focusing on user experience and accessibility.

Implemented form validation and styling to ensure a clean and intuitive interface, enhancing user engagement and contributing to a seamless registration process.

### ● To create a Business consulting website using HTML,CSS

Designed and developed a Business Consulting Website using HTML and CSS, incorporating a professional layout and responsive design.

Focused on showcasing services and client testimonials, while ensuring optimal user experience across various devices. Employed best practices in web design to enhance site navigation and accessibility.

### ● To create a Signup page using React

Designed and implemented a user-friendly signup page using React, ensuring seamless user experience and responsiveness.

Connected the application to MongoDB for secure storage and management of user data, facilitating efficient data handling.

## CERTIFICATE

- Attended a one-day workshop on UI/UX Design at CIT in 2023, gaining insights into user-centered design principles and best practices
